## TERMS, CONDITIONS & VERIFICATION CONSENT

Read all terms carefully. The school should retain a copy of the completed application.

### 1. Purpose and scope

This form requests school registration on School OS AI and supports verification of the school, its authorised representative and the submitted information. It is not an account-creation form.

### 2. Accuracy and authority

The applicant must have authority to submit the request for the school. Information must be truthful, current and complete to the best of the applicant's knowledge. Forged signatures or stamps, altered evidence, impersonation or deliberate misrepresentation may result in rejection and further review.

### 3. Printed form and approvals

Download and print the form, complete applicable fields, obtain the Principal / Head signature, apply the official school stamp and school office verification stamp, scan all pages into one clear PDF, and upload it through the official registration page. Retain the original.

### 4. Verification checks

The administrator may check the official school website, published contact details, board affiliation, government recognition, UDISE / registration code, location information and supporting evidence. The administrator may contact the school through an official channel or request clarification.

### 5. Application status and decision

The application may be marked Received, Under Review, Pending Information, Returned for Correction, Approved or Rejected. Submission is not approval. The administrator may request clearer scans or additional evidence and should record the decision.

### 6. Account creation and credentials

No account is created merely by submitting this form. After approval, the administrator may create or enable principal credentials through the approved process. Credentials must be delivered securely and kept confidential. Never write passwords on this form.

### 7. Role-based access

Access should be assigned according to verified roles and least privilege. Principal, teacher, student, parent and administrator accounts should have separate permissions. Approval does not authorise access to another school's records.

### 8. Data minimisation and prohibited uploads

Submit only information needed for registration. Do not upload student records, student identity documents, student photographs, medical information, passwords, payment-card details or unrelated personal documents. Location evidence should be limited to relevant school premises or address evidence.

### 9. Use of submitted information

Submitted details and attachments may be used by authorised personnel for registration review, verification, fraud prevention, contacting the school, maintaining the registration record and administering access. The platform operator should provide an appropriate privacy notice and contact channel.

### 10. Access controls and security

The operator should apply reasonable safeguards, including restricted administrator access, secure transmission, protected file storage, access logging where appropriate and a process for suspected security incidents. No online service can guarantee absolute security.

### 11. Retention, correction and deletion

The operator should define how long pending, rejected and approved applications are retained and how records are securely deleted when no longer needed. The school may request correction or ask about deletion through the official administrator contact, subject to applicable obligations.

### 12. Location and GPS information

GPS coordinates should identify the school premises, not a private residence unless that is the official school premises. The applicant is responsible for checking the map pin and ensuring that location evidence is relevant and accurate.

### 13. File quality and limits

Uploaded documents must be readable, complete and in supported formats. The registration page should display accepted formats and size limits. Do not upload malicious files or documents the school is not authorised to disclose.

### 14. Pending, returned or rejected applications

An application may be held, returned or rejected if it is incomplete, inconsistent, unverifiable, unauthorised or appears fraudulent. The administrator should record the reason and, where appropriate, explain the correction or evidence needed.

### 15. Changes to school details

Notify the administrator when material details change, including principal, official email, phone number, affiliation, recognition status, address or managing organisation. Re-verification may be requested.

### 16. School responsibilities

The school is responsible for ensuring submitted information and documents are authorised for disclosure, the signer can represent the school, and personnel follow account-security rules after approval.

### 17. Availability and feature access

Approval does not guarantee every feature will be enabled immediately. Availability may depend on configuration, permissions, technical service, subscription or service arrangements, and applicable policies.

### 18. AI-generated content and decisions

AI summaries, reports, recommendations and alerts may be inaccurate and should be reviewed by authorised staff. AI must not independently make consequential decisions about students or staff without appropriate human review.

### 19. Communication

The official email and phone details supplied may be used for application status, verification questions, security matters and account setup. The school should ensure these channels are monitored by authorised staff.

### 20. No guarantee of approval

A signed or stamped form is evidence for review but does not by itself prove authenticity or guarantee approval. The authorised administrator makes the approval decision under the platform's verification procedure.

### 21. Updates to terms

The operator should publish current terms and privacy information and communicate material changes through an appropriate channel. The school should review the terms in force when using the service.

### 22. Acceptance

By signing below, the Principal / Head confirms they have read and understood these terms, have authority to submit the application and consent to the submitted school information being used for the registration and verification purposes described here.

## SECTION L — ACCEPTANCE OF TERMS

I confirm that I have read and understood the terms and conditions above and agree to submit this application for school registration and verification.
